Professional Summary

Junior Data Analyst specializing in Data Analysis, Business Intelligence, and Applied Artificial Intelligence. Skilled in SQL Server, Python, Power BI, and Excel for transforming raw data into actionable insights and interactive dashboards. Experienced in ETL processes, KPI development, and data-driven decision-making.

Experience

Data Analysis Trainee | Digilians – Digital Pioneers Initiative (Dec 2025 – Present)

• Built relational databases using SQL Server and performed complex queries (Joins,

Aggregations).

• Designed interactive Power BI dashboards using DAX and data modeling.

• Applied ETL processes using Python (Pandas, NumPy) and conducted EDA.

Psychologist & Behavioral Specialist | Bashayer Al Khair Foundation (Feb 2025)

• Analyzed behavioral datasets improving treatment efficiency by 30%.

• Developed data-driven performance tracking metrics.

Technical Support Specialist | WE Communications (2023 – 2024)

• Resolved 40+ issues daily with 95% customer satisfaction.

• Identified recurring trends through data analysis and reporting.

Pharmacy Assistant | Multiple Pharmacies (2017 – 2022)

• Managed inventory datasets for 200+ products reducing discrepancies by 15%.

• Analyzed sales records to optimize stock levels.

Projects

Sales Performance Analysis Dashboard

• Analyzed retail sales dataset to identify revenue trends.

• Built interactive Power BI dashboard with KPI tracking.

• Tools: SQL Server, Python, Power BI, Excel.

Customer Churn Prediction Model

• Built machine learning classification model for churn prediction.

• Performed feature engineering and model evaluation.

• Tools: Python, Pandas, Scikit-learn, Matplotlib.

Education

Bachelor of Arts in Psychology – Alexandria University (2019)

Technical Skills

Python (Pandas, NumPy), SQL Server, Power BI (DAX, Data Modeling), Excel (Power Query, Pivot Tables), ETL, EDA, Data Visualization, Statistical Analysis, Git, GitHub.
